MYSMARTFLEET BY FRAIKIN

A guide to Fraikin's one-stop-shop for connected fleet management.

Modern vehicles generate vast amounts of valuable data, but are you using this information to its full potential? Through **MYSMARTFLEET**, Fraikin can help you put that data to work, optimising everything from driver behaviour, to improved safety and vehicle compliance.

SIX REASONS TO GET SMART

Available for both new and existing vehicles via a simple retrofitting process, Fraikin's full suite of **MYSMARTFLEET** digital solutions allows customers to create a bespoke approach that delivers genuine cost savings and improved efficiency, built through six distinct packages:

1 Start with the basics

Our entry-level **SMART BASICS** package offers an accessible starting point into the world of connected fleet management and this turnkey solution is included with every Fraikin full service vehicle contract.

Through **SMART WATCH** and **SMART WATCH TRAILER** customers have full visibility of their vehicles and trailers, helping to optimise fleet utilisation.

For those operating electric vehicles, **SMART EV** provides an additional layer, monitoring critical metrics such as battery and charging status, ensuring your EVs are always ready to go.

2 Keep your cool

SMART FRIDGE is designed for temperature-controlled vehicles, giving customers the ability to manage their assets remotely. In addition to providing full fleet visibility, **SMART FRIDGE** allows operators to monitor unit temperature, internal humidity and the door status of each vehicle from any connected device.

This helps to provide full product traceability to ensure cold chain compliance, while maximising the operational efficiency of your fleet. In addition, optimising the use of your fridge units can also help to lower carbon emissions.

3 Compliance made easy

SMART TACHO and **SMART FLEET CHECK** make meeting industry regulations simple.

Combine state-of-the-art vehicle telematics with your driver tachograph information through a single dashboard, then, using **SMART FLEET CHECK**, collate vehicle data from driver walkaround checks using the dedicated app, helping to streamline your daily fleet tasks.

Utilising connected technology and a dedicated app, **SMART ROUTE** provides you and your customers oversight on dispatch status while also delivering efficiency in your route planning.

4 Safety first

MYSMARTFLEET can also play a key front-line role in protecting your drivers and your vehicles – our safety-related technologies are a testament to this.

Through **SMART SAFE**, operators can improve fleet safety thanks to real-time driver coaching via our easy-to-use app, including scoring for economical driving and detailed safety analysis reporting.

5 Crystal clear

For those wanting to take safety further, **SMART VISION** includes the latest range of AI-enabled camera technology, whether installed inside the cab or through the full 360° around the vehicle.

In the case of an incident or accident, this technology can provide vital evidence, helping to dispute wrongful claims and even lower your insurance premiums.

6 All the above, and more!

For customers eager to embrace all that Fraikin's connected technology can deliver, **SMART ESSENTIALS** is the package for you. Through our cutting-edge digital tools and a consultative review of your fleet, we can help you take advantage of comprehensive performance analysis, using the data to significantly enhance operational efficiency, while improving compliance and safety management, and much more.

Our expert team, always on hand to help

Though connected fleet management holds huge potential to save you both time and money, we understand that knowing where to start can be daunting.

At Fraikin, our expert team is ready and waiting to guide you through your digital journey, helping with any specific requests, ensuring that we can build a bespoke **MYSMARTFLEET** package that works for your business.
